[Community > Immunization > Cold Chain] High - VERIFIED

Q5. Which vaccine can be frozen?

- A) BCG
- B) Polio
- C) MMR
- D) DPT/DT

Answer: C) MMR

Explanation:

Correct - C: MMR = Live attenuated, freeze-dried → CAN be frozen -20°C. Diluent separate. OPV also can be frozen.

Incorrect - A: BCG = Freeze-dried but NOT frozen, store 2-8°C. Freezing destroys.

Incorrect - B: OPV can be frozen but not given as option with MMR. If both present, OPV also correct.

Incorrect - D: DPT/DT = T-series vaccines, NEVER freeze. Alum adjuvant precipitates.

Trick: "MMR = Measles Must Refrigerate or Freeze". "T-series = Thaw NOT, Shake test".

Q15. What will you do if you have a needle stick injury from an HIV patient?

- A) Give an incision to the injury
- B) Suck out the blood
- C) Squeeze out the blood
- D) Wash with soap and water

Answer: D) Wash with soap and water

Explanation:

Correct - D: NSI protocol: 1) Wash immediately with soap + water 2) Don't squeeze/suck 3) Report 4) PEP within 72hrs if HIV/HBV/HCV 5) Baseline testing.

Incorrect - A/B/C: Incision/sucking/squeezing ↑tissue damage, ↑infection risk.

Trick: "Needle Stick = Wash Quick". No milking wound. PEP within 2hrs best.

Q9. Which disease is not included in Mission Indradhanush?

- A) Tetanus
- B) Diphtheria
- C) Pneumonia
- D) Whooping cough

Answer: C) Pneumonia

Explanation:

Correct - C: Mission Indradhanush = 12 diseases: DPT, Polio, Measles, HepB, TB, JE, Rotavirus, Hib, Rubella, Pertussis, Tetanus, Pneumococcal. Pneumonia itself not vaccine, PCV for pneumococcal included but pneumonia as disease not listed separately.

Incorrect - A/B/D: Tetanus/Diphtheria/Pertussis = DPT included.

Trick: "Indradhanush = 12 colors = 12 vaccines". Pneumonia = syndrome, not specific vaccine name.

Q13. Which of the following is a live attenuated vaccine?

- A) Polio (Salk)
- B) BCG
- C) Hepatitis B
- D) Rabies (inactivated)

Answer: B) BCG

Explanation:

Correct - B: Live vaccines = BCG, MMR, OPV, Rotavirus, Yellow fever, Varicella. BCG = Mycobacterium bovis live attenuated.

Incorrect - A: Salk Polio = Inactivated/killed.

Incorrect - C: Hep B = Recombinant subunit.

Incorrect - D: Rabies = Inactivated.

Trick: "Live vaccines = BOMB Measles" = BCG, OPV, MMR, Measles, Mumps.

[Community > HAI > Prevention] High - VERIFIED [UNIQUE]

Q20. Which of the following is the most common cause of hospital-acquired infection?

- A) Urinary tract infection
- B) Pneumonia
- C) Surgical site infection
- D) Septicemia

Answer: A) Urinary tract infection

Explanation:

Correct - A: UTI = #1 HAI, 40% of all HAI. Cause = Urinary catheters. E.coli common. Prevention = catheter care, remove ASAP.

Incorrect - B: Pneumonia = VAP 2nd most common.

Incorrect - C: SSI = 3rd.

Incorrect - D: Septicemia = outcome, not type.

Trick: "CAUTI = Catheter Associated UTI = Commonest HAI". Remove foley ASAP.

[Med-Surg > GI > PUD] High - VERIFIED [UNIQUE]

Q21. Which of the following is the most common cause of peptic ulcer?

- A) Stress
- B) H. pylori infection
- C) Smoking
- D) Alcohol

Answer: B) H. pylori infection

Explanation:

Correct - B: H.pylori = 90% duodenal ulcers, 70% gastric ulcers. NSAIDs 2nd cause. Treat = Triple/Quad therapy.

Incorrect - A/C/D: Stress/Smoking/Alcohol = risk factors, not most common cause.

Trick: "HP = HelicoPylori = Hole in Pylorus". Test = Urea breath, biopsy.
